Objective

As a web DEVELOPER, my objective is to make a positive impact on clients, co-workers, and the Internet using my skills and experience to design compelling and attractive websites.

SOFT SKILLS

Communication, Problem solving, Teamwork, Adaptability, Time management

ABOUT ME

My name is Abdelrahman, I live in Egypt, I've been studying computer science for two years. In order to kick-start my career before I graduate, I am looking for a job of a web developer, since that's what I've been doing already for the past 2 years in my free time. Designing websites for friends, developing simple e-shops with the help of some open source content-management systems, and so on. Besides that I am a normal guy who enjoys sport and spending time with friends, while not working or studying, which takes most of my time of course. If I should pick the best website I've created up to this point, it will be this one : <https://mern-estate-ovlj.onrender.com/> because it's my very first full stack app. I am ambitious and hard-working and believe you'll give me a chance to prove my words.

EDUCATION

B.A/CIVIL ENGINEERING

Higher institute of engineering and technology
